Product Name: Dimethylformamide

Safety Data Sheet

1. PRODUCT IDENTIFICATION

Name: Dimethylformamide
Synonyms: N,N-dimethylformamide, n-formylidimethylamine, DMF
CAS#: 68-12-2
Europe EC#: 200-679-5
Product Uses: solvent for liquids & gases; organic synthesis, mfg. of polyacrylic fibres, etc

EMERGENCY INFORMATION
Canada: Call CANUTEC (collect) (613) 996-6666
U.S.A.: Call CHEMTREC (800) 424-9300

2. HAZARDS

GHS Class: flammable, eye irritant, reproductive, STOT, acute skin, acute inhal.
(Category): (3), (2A), (2B), (3), (4), (4)
Signal Words: WARNING, WARNING, DANGER, WARNING, WARNING

Hazard Statements:
- flammable liquid & vapour (H226)
- eye irritation (H319)
- causes serious eye irritation (H335)
- may damage fertility or the unborn child (H360)
- may cause respiratory tract irritation (H335)
- harmful in contact with skin (H312)
- harmful on inhalation (H331)

GHS Precautionary Statements for Labelling:
P210: Keep away from heat, sparks, open flames and hot surfaces. No smoking.
P240: Ground or bond container and receiving equipment.
P262: Do not get in eyes, on skin or on clothing.
P264: Wash thoroughly after handling.
P270: Do not eat, drink or smoke when using this product.
P280: Wear eye protection, protective gloves and clothing of butyl.
P313 & P333: If skin irritation or rash occurs, get medical advice/attention.

Canada – WHMIS
Key: B 3, D 2B
B 2 – Flash Point <38°C, B 3 – Flash Point >38°C & <93°C
D 1 – Immediately Toxic, D 2 – Chronic Toxicity
C – Oxidising Substance, E – Corrosive, F – Reactive Substance

4. FIRST AID

SKIN: Wash with plenty of water. Remove contaminated clothing and do not reuse until thoroughly laundered.

EYES: Wash eyes with plenty of water, holding eyelids open. Seek medical assistance promptly if there is irritation.

INHALATION: Remove from contaminated area promptly. **CAUTION: Rescuer must not endanger himself!** If breathing stops, administer artificial respiration and seek medical aid promptly.

INGESTION: Give plenty of water to dilute product. Do not induce vomiting (NOTE below). Keep victim quiet. If vomiting occurs, lower victim’s head below hips to prevent inhalation of vomited material. Seek medical help promptly.

**Inadvertent inhalation of vomited material may seriously damage the lungs. The danger of this is greater than the risk of poisoning through absorption of this relatively low-toxicity substance. The stomach should only be emptied under medical supervision, and after the installation of an airway to protect the lungs.**

5. FIRE FIGHTING & FLAMMABILITY

- **Flash Point**: 58°C / 136°F (closed cup)
- **Autoignition Temperature**: 435°C / 815°F; also 445°C / 833°F
- **Flammable Limits**: 2.2% – 15.2%
- **Combustion Products**: carbon monoxide, nitrogen oxides, dimethylamine
- **Firefighting Precautions**: foam, dry chemical, water fog or spray, product floats on water – water jet spreads flames; firefighters must wear SCBA
- **Static Charge Accumulation**: cannot accumulate a static charge on agitation or pumping

6. ACCIDENTAL RELEASE MEASURES

- **Leak Precaution**: dyke to control spillage and prevent environmental contamination
- **Handling Spill**: ventilate contaminated area; recover free liquid with suitable pumps; absorb residue on an inert sorbent, sweep & pick up using plastic or aluminium shovel, & store in closed containers for recycling or disposal

7. HANDLING & STORAGE

Store in a cool, dry environment, away from sources of ignition, heat, oxidising agents & substances listed in part 10. The flash point is quite high, but protection from sparks is prudent. Empty containers may contain a flammable or explosive vapour. Ensure that containers, empty or full, are tightly sealed unless in use.

Avoid generating or breathing product vapour. If vapour forms in use, install adequate exhaust ventilation. If dealing with a spill, and ventilation is impossible or impractical, wear a suitable respirator with organic vapour cartridge.

Never cut, drill, weld or grind on or near this container. Avoid contact with skin and wash work clothes frequently. An eye bath and safety shower must be available near the workplace.

8. EXPOSURE CONTROL & PERSONAL PROTECTION

9. PHYSICAL PROPERTIES

Odour & Appearance clear, colourless to slightly yellow, hygroscopic liquid with fishy odour
Odour Threshold 0.05ppm
Vapour Pressure 2.7mmHg / 0.36kPa (20°C / 68°F)
Evaporation Rate (Butyl Acetate = 1) 0.17
Vapour Density (air = 1) 2.5
Boiling Range 153°C / 307°F
Freezing Point -61°C / -78°F
Specific Gravity 0.95 (20/20°C)
Water Solubility complete
Also soluble in alcohol, ether, acetone, benzene
Log P_{OW} (Octanol/H_{2}O partition) -0.85
Viscosity 0.8centipoise (20°C / 68°F)
pH 6.7 (0.5 molar solution in water) – very slightly acidic
Conversion Factor 1ppm = 3.04mg/m^3
Molecular Weight 73grams per mole

10. REACTIVITY

Dangerously Reactive With strong oxidising agents, carbon tetrachloride (with iron), hot solutions of sodium tetrahydroborate, sodium metal, chlorine, bromine,
Also Reactive With cynauric chloride, triethylaluminum, sodium hydride, 2,4,6-trichloro-1,3,5-triazine
Stability stable; will not polymerize; however, polymerizes methylene bisphenyl diisocyanate violently
Decomposes in Presence of begins above 350°C / 660°F
Decomposition Products none apart from Hazardous Combustion Products
Sensitive to Mechanical Impact no

11. TOXICITY

Effects, Acute Exposure may be slightly irritating (conflicting evidence\(^1\))
Skin Contact yes; no toxic effects are likely by this route
Eye Contact irritating (7 of 9 reports\(^1\)); severely irritating (2 of 9 reports\(^1\)), may cause reversible damage\(^1\);
vapour may irritate eyes\(^1\)
Inhalation strongly irritating; may cause chemical burns in lungs (low vapour pressure reduces risk)
Ingestion strongly irritating to mouth, throat and stomach; facial flushing, nausea, vomiting, dizziness may occur
LD_{50} (oral) 2000, 3010\(^1\), 4000, 4320 & 7170mg/kg (rat), 2900 & 3750mg/kg (mouse), 5000mg/kg (rabbit)
LD_{50} (skin) 5000mg/kg (rabbit), >3160mg/kg (rat)\(^1\) – one of 4 rats died at this dose
LC_{50} (inhalation) 1925\(^1\) & 3420ppm (rat), 3100 & 3300ppm (mouse),

Effects, Chronic Exposure prolonged exposure may cause dermatitis
General not a sensitizer in humans or animals
Carcinogen/Tumorigen not considered a tumorogen or a carcinogen in humans or animals
Reproductive Effect no known effect in humans; reduced fertility in mice on ingestion (NOAEL <1000mg/kg in drinking water)\(^1\)
teratogen in rabbits on inhalation (NOAEL 150mg/m^3, day 7 to 19 post-insemination)\(^1\)
Embryotoxic in rabbits on dermal application (NOAEL 200mg/kg/day, day 6 to 18 post-insemination)\(^1\)
Mutagen no known effect on humans or animals
Synergistic With not known

Please ensure that this SDS is given to, and explained to people using this product.

Product Name: Dimethylformamide

12. ECOLOGICAL INFORMATION

Bioaccumulation: water soluble – not a bioaccumulator
Biodegradation: biodegrades readily & rapidly in sewage treatment facilities; 95% in 7 days\(^1\), 100% in 3-6 days & 21 days\(^1\)
Abiotic Degradation: reacts with atmospheric hydroxyl radicals; estimated ½-life in air is 22 hours
Mobility in soil, water: water soluble; moves readily in soil and water
Aquatic Toxicity:
- \(L_C_{50}\) (Fish, 96hr): >7100mg/litre (Lepomis macrochirus), >9800mg/litre (Oncorhynchus mykiss & Salmo gairdneri), 10,500mg/litre (Pimephales promelas), 8366mg/litre (Salvelinus fontinalis)
- \(E_C_{50}\) (Crustacea, 48hr): 7500, 14,400 & 15,700mg/litre (Daphnia magna)
- \(E_C_{50}\) (Algae): 890mg/litre (Chlorella pyrenoidosa), >500mg/litre (Scenedesmus subspicatus)
- \(E_C_{50}\) (Bacteria): 2000 & 20,000mg/litre (Photobacterium phosphoreum), 570mg/litre (Anabena inaequalis)

13. DISPOSAL

Waste Disposal: do not flush to sewer, recycle solvent if possible; may be incinerated in approved facility; rapid biodegradation suggests that biodestruction could be an effective means of disposal
Containers:
- Drums should be reused. Recondition and pressure test by a licensed reconditioner prior to re-use.
- Pails must be vented and thoroughly dried prior to crushing and recycling.
- IBCs (intermediate bulk containers): polyethylene bottle must be pressure tested & recertified at 30 months. Replace at 60 months (5yrs). Steel containers must be inspected, pressure tested & recertified every 5 years.
  \(\text{Never cut, drill, weld or grind on or near this container, even if empty}\)

15. REGULATIONS, cont’d

U.S.A. Regulations:

Immediately Dangerous to Life or Health: 500 ppm

OSHA Standards: Permissible Exposure Limit: Table Z-1 8-hr Time-Weighted Avg: 10 ppm (30 mg/cu m). Skin Designation.

NIOSH Recommendations: Recommended Exposure Limit: 10 Hour Time-Weighted Average: 10 ppm (30 mg/cu m), skin.

Threshold Limit Values: 8 hr Time Weighted Avg (TWA): 10 ppm, skin. Excursion Limit Recommendation: Excursions in worker exposure levels may exceed 3 times the TLV-TWA for no more than a total of 30 minutes during a work day, and under no circumstances should they exceed 5 times the TLV-TWA, provided that the TLV-TWA is not exceeded. A4: Not classifiable as a human carcinogen. Biological Exposure Index (BEI): Determinant: N-methylformamide in urine; Sampling Time: end of shift; BEU: 15 mg/L. Biological Exposure Index (BEI): Determinant: N-acetyl-S-(N-methylcarbamoyl) cysteine in urine; Sampling Time: prior to last shift of workweek; BEU: 40 mg/L. Notation: The biological determinant is an indicator of exposure to the chemical, but the quantitative interpretation of the measurement is ambiguous. These determinants should be used as a screening test if a quantitative test is not practical, or as a confirmatory test if the quantitative test is not specific and the origin of the determinant is in question.

Atmospheric Standards: This action promulgates standards of performance for equipment leaks of Volatile Organic Compounds (VOC) in the Synthetic Organic Chemical Manufacturing Industry (SOCMI). The intended effect of these standards is to require all newly constructed, modified, and reconstructed SOCMI process units to use the best demonstrated system of continuous emission reduction for equipment leaks of VOC, considering costs, non air quality health and environmental impact and energy requirements. N,N-Dimethylformamide is produced, as an intermediate or a final product, by process units covered under this subpart. Listed as a hazardous air pollutant (HAP) generally known or suspected to cause serious health problems. The Clean Air Act, as amended in 1990, directs EPA to set standards requiring major sources to sharply reduce routine emissions of toxic pollutants. EPA is required to establish and phase in specific performance based standards for all air emission sources that emit one or more of the listed pollutants. N,N-Dimethylformamide is included on this list.

State Drinking Water Guidelines: Florida 700 ug/L, Maine 700 ug/L

CERCLA Reportable Quantities: Persons in charge of vessels or facilities are required to notify the National Response Center (NRC) immediately, when there is a release of this designated hazardous substance, in an amount equal to or greater than its reportable quantity of 100 lb or 45.4 kg. The toll free number of the NRC is (800) 424-8802. The rule for determining when notification is required is stated in 40 CFR 302.4 (section IV.D.3.b).

TSCA Requirements: Pursuant to section 8(d) of TSCA, EPA promulgated a model Health and Safety Data Reporting Rule. The section 8(d) model rule requires manufacturers, importers, and processors of listed chemical substances and mixtures to submit to EPA copies and lists of unpublished health and safety studies. N,N-Dimethylformamide is included on this list. Effective date: 4/13/89; Sunset date: 12/19/95.

FDA Requirements: Dimethylformamide is an indirect food additive for use only as a component of adhesives.

16. OTHER INFORMATION

Prepared for Megaloid Laboratories by Peter Bursztyn, (705) 734-1577

Data from RTECS, HSDB (Haz. Substance Data Base), Cheminfo (CCOHS), IUCLID Datasheets (ESIS – European Chem. Substance Info. System), & others. Preparation Date: January 2003 Revision Date: January 2006, January 2009, January 2012, January 2015
